

The 4th Global Ocean Acidification Observing Network (GOA-ON) International Workshop

Apr. 14 - 17, 2019 • Hangzhou, China

GOA-ON Carbon Offsetting

The GOA-ON is dedicated to hosting an environmentally friendly international workshop through offsetting its carbon footprint. To this end, the 4th GOA-ON International Workshop Organizing Committee will be donating to a relevant carbon offset project to cover the carbon footprint of participants' travels, as well as and conference organizing. Thus, the workshop Organizing Committee invites attendees to voluntarily pay **¥ 200 or \$25** as a 'green fee' in addition to the registration fee. Collectively, the donations raised will go towards a selected local carbon offset program in China. The specific offsetting program will be announced here when the program is strictly screened. We anticipate that the carbon footprint associated with the workshop will be fully offset through these donations. The Organizing Committee is also taking steps to reduce the carbon footprint of the workshop in many other ways.

We thank you in contributing to this effort. You can check back here for updates on the carbon offsetting program screening and donation!
